

COOKING WITH ACCOUNTANTS HOW TO COOK A BOOK

THE DIRTY DOZEN

The staple egg. Outwardly so white and pristine, signifying the essence of simplistic beauty and an unchanging form of purity. Crack this consistent shell and you'll find an altogether different side of our rotund cooking counterpart.

So too with corruption. Behind a seemingly stable structure within private and government organizations, billions of dollars have and currently are being diverted away from those who need it most into hidden agendas that rarely reveal the truth. We have compiled a selection of Africa's most deceptive leaders from a variety of credible sources with the hope of cracking through a shell that conceals an already messy situation.

Advocating for more effective aid.
